

XT-Spyke

Outdoor Line Array

Applications

- Theme parks
- Water parks
- Outdoor events
- Small stadiums

Features

- Two-way, full range line array in sealed, weatherproof enclosure
- 150 watt power handling
- Eight 3.0" (76 mm) polypropylene woofers
- Eight 1" (25 mm) aluminum dome tweeters
- Aluminum grille and weatherproof mounting bracket
- Wall, spike and flown mounting options
- 4 ohm input impedance
- Optional 120w transformer provides taps for 25v, 70.7v and 100v operation
- Durable, weatherproof Neutrik speakON connectors
- Dispersion of 120° horizontal and 50° vertical (preliminary)

Designed for outdoor audio applications, the XT-Spyke delivers long throw with high intelligibility and musicality. This columnar line array has a slim profile and may be wall mounted, "spike" mounted or flown. Its wide horizontal and narrow vertical dispersion pattern provides broad, powerful coverage for themed entertainment and outdoor events.

Fully weatherproof, the XT-Spyke features a sealed enclosure with aluminum grille and weatherproof mounting bracket; connections are made via a Neutrik speakON weatherproof input jack.

An optional 120w transformer with six position tap switch is available.
